UCTonline.com

Greetings!

Underground Construction Technology International Conference & Exhibition (UCT) is the premier business event in the United States focusing on the **total underground utility pipe infrastructure**. Whether its new construction or rehabilitation, utilizing trenchless or conventional techniques, if it has to do with underground utility piping systems, you'll find helpful solutions and new technologies during UCT, **Tuesday, Jan. 30-Thursday, Feb. 1, 2018 in New Orleans, LA.**

Your time is important and at UCT, it really counts. UCT is early in the year, before construction season kicks off. Attendees can **earn up to 30 PDHs** during the educational program – this is a substantial portion of your annual accreditation needs. Exhibitors can **network with key decision makers** across the entire underground utility supply chain during the span of one business trip.

We've partnered with CUIRE (the Center for Underground Infrastructure Research & Education) to bring you its Trenchless Technology Inspector Training and Certification Schools (on Monday, Jan. 29-Tuesday, Jan. 30). Another partner of UCT 2018 is NASSCO (the National Association of Sewer Service Companies), which will have its Pipeline Assessment & Certification Program and PACP Trainer Courses before and after UCT. You'll find details on these programs later in the UCT section.

The primary UCT program (Tuesday, Jan. 30-Feb. 1) features four tracks on Horizontal Directional Drilling, a special workshop on Municipal Grouting, tracks on Sewer Construction and Rehabilitation, an Engineering Ethics track and more!

Networking is vital for expanding your business connections. That's why we're offering several options, close to where you'll be when on-site. The mid-morning coffee service will be located near the educational sessions on Tuesday and Wednesday. Grab-and-go lunch will be available in the exhibit hall Tuesday and Wednesday afternoon. The **annual welcome reception** is moving to the exhibit hall Tuesday afternoon. Happy hour will be Wednesday afternoon. And on Thursday, you can join your colleagues for breakfast, before the exhibit hall closes and we say goodbye to UCT until 2019.

Streamlined registration rates offer multiple attendees from the same company the opportunity to learn and network together. "Bring The Company" to the main UCT program for \$495 – this rate is good for two, to as many as 25, company employees.

The Municipal Partnership Program grants complimentary admission to the UCT main program. This registration option is for municipal/public works/government employees. And, if your interests are the exhibits only, you may register to visit the hall for free!

Complete program, registration and hotel information is online at UCTonline.com.

We look forward to helping you get business done in New Orleans!

**Strategically timed,
UCT is before
the height of the
construction season.**

UCT features North America's most comprehensive collection of equipment and technologies used in rehabilitating the underground utility piping infrastructure. Discover, experience and learn to use equipment and products by attending demonstrations in the RehabZone and in exhibit booths. Easily source new contacts from a wide range of categories in the exhibit hall, including directional drillers, liners, CCTV systems, locators, mud mixing systems, pipe bursting equipment, pumps and more. Network during the receptions. Exchange ideas with your peers during breakfast.

**See the program for more of what you
can take advantage of.**

Best regards,

Karen E. Francis
